Proven Secrets Of Driving Her Wild With Your Fingers

GET AN A AT FINGERING HER

Giving her a mind-blowing orgasm every time, with only the smooth touch of your fingers is an art worth mastering. The female orgasm- unlike that of the male of the species- is sometimes a complicated beast, captured only with a set of specific moves. Also, did you know that women climax with varying degrees of intensity? When it hits a hard 10 on the pleasure scale, I'm talking an orgasm so intense that steam rises off her body, every hair on her head curls damply and there isn't a square inch of her not dripping with sweat. You'll be glad to know that fingering your partner until she reaches an orgasm she'll never forget can be achieved in just a few extremely enjoyable steps. Sit tight, have your fingers ready and start taking notes!

A MATTER OF CLEANLINESS

Before you go on with a juicy part, it's important you take care of the hygienic aspect. Trim your nails and wash your hands. You don't want to go all Edward Scissor-Hands on her. Nothing can ruin the mood faster than a jagged nail that can damage her delicate parts. Be sure that you have gotten rid of any hang nails or rough edges that can hurt her. Along with trimming your nails, make sure your fingers, nails and hands are clean, so that you don't expose her to bacteria or dirt, or even getting pregnant, if you've done it beforehand and there's semen on your hands.

THE IMPORTANCE OF ASKING THE RIGHT QUESTIONS

Now that you're good and ready, there's one more aspect to take into consideration. Finding out which type of touch packs the

Proven Secrets Of Driving Her Wild With Your Fingers

maximum bliss for your partner is extremely important, because now you really now what works best for her in particular. If one woman adores you to practically drill her with your fingers, another one might appreciate something more on the soft side. ID her C-style with this small quiz, made of only 3 simple questions. When you're in an intimate situation, preferably after you've just had sex, ask her what she likes more. Thus she'll be more willing to open up to you in all sincerity, without feeling awkward about it.

1. WHICH KIND OF CLITORAL CONTACT FEELS BEST?

- A. I prefer to be touched with my underwear still on, so I can feel the sensations through the fabric.
- B. I love of mix of direct and indirect stimulation.
- C. I want constant, consistent pressure on my hot spot.

2. WHAT KIND OF MANUAL MOVEMENT DO YOU WANT ME TO USE ON YOUR CLITORIS?

- A. Move just your fingertips in a soft, caressing motion.
- B. Keep switching things up- using circles or figures of eight or going side to side.
- C. Press the palm and heel of your hand against it.

3. WHEN YOU USE YOUR VIBRATOR FOR SOLO ACTION, WHAT'S YOUR GO-TO SETTING FOR MAXIMUM PLEASURE?

- A. I don't use a vibe- I prefer my hand instead.
- B. Slow, long pulses.
- C. Fast, short vibrations.

If she answered mostly As, her C-spot MO is Soft. Since indirect touch excites her most, I have two words for you: dry humping. Yeah, it's a throwback, but it delivers the clitoral pressure she requires. Start by kissing with your clothes or undies on. Then, when the tension becomes unbearable, climb on top of her. Move your fingers in slow circles. Her clothes create a barrier, so her clitoris gently rubs against the fabric. For upping her pleasure, also press your package against her.

Magic Hands

If she answered mostly Bs, her C-spot MO is medium. Her clitoris responds best to various sensations instead of one predictable pattern. A combination of light and indirect and harder and direct touch will give her the biggest bang. During fingering, use the flat part of your palm to make long, slow strokes with medium pressure. Combine this with some licking as well, to make it more interesting. Use your tongue to lick from side to side over her labia, then her clitoris, then over the labia again. This will tease her clitoris (in a good way) with direct and indirect contact.

If she answered mostly Cs, her C-spot MO is hard. To get the kind of constant contact she's after while you're stroking her manually, take her hand and put it on top of yours, suggesting you want her to show you the precise kind of stimulations she needs. She won't mind directing you to the amount of pressure that will have her reach the much desired orgasm. She is still craving more? To really up the ante while you're down there, take her clitoris into your mouth and suck on it- it will boost the pressure and feel awesome for her.

THE FOUR RULES YOU HAVE TO LEARN NOW

So you've learned how she works down there, what she likes and what will make her come as fast and hard as a thunderbolt. But, if you want to turn ordinary fingering into an extraordinary climatic one, there are four rules you needs to obey. Don't worry, they are easy as pie!

1) Look. It's true that, for women, sex is more linked to narratives and emotions. In order to get a girl revving like a happy bee, you normally have to use a bit of skillful imagery. The brain is the biggest sexual organ after all, I'm sure you know that by now. Sexperts all over the world have always said that only a guy's brain gets turned on by filthy visuals, but it's not true, I assure you. Women get turned on by this kind of artifice as well, you don't have to always pretend to be romantic and emotional to get them hot and bothered.

IF YOU WANT TO TURN ORDINARY FINGERING INTO AN EXTRAORDINARY CLIMATIC ONE, THERE ARE FOUR RULES YOU NEEDS TO OBEY. DON'T WORRY, THEY ARE EASY AS PIE!

Magic Hands

Send her a text describing exactly what you want to do to her later. Don't be afraid to use blatant words like "pussy" and "cock". She'll be surprised, but also turned on. Once you finally see her, start stripping her slowly, looking her deep in the eyes. As you do this, she'll soon connect with your sexual energy and get into character as well.

2) Lick and touch. Great sex is all about give and take, so if you're hoping for your own mind-blowing orgasm, you have to be extraordinarily generous in return. The first rule when it comes to pleasing your partner: take your time. No grabbing her labia hard and pumping your fingers into her vagina furiously, please. Kiss her thighs, gently play with her nipples, and massage her vulva deeply with your thumb and fingers. Use the tip of your tongue to lick her here and there, but don't go full oral on her straight away. The skin surrounding her clitoris is the most sensitive, so touch her there with uttermost tenderness. Stimulate this area with your tongue and at the same time use your fingers to do the job around the rest of her intimate parts. Once you feel her getting wet, insert one finger, and then two in her vagina. Don't stop licking her clit at the same time. The double pressure gives her really intense feelings.

3) Linger. Tantric sex teaches the importance of bringing a woman to the brink, then backing off, to build up the intensity of her climax.

"Any woman can experience an all-over body orgasm from delayed finishing, with your help", says Aleena Aspley, founder at Ra'Anui Erotic Tantra. For at least 20 minutes, tease her while she breathes slowly. Women have untapped sexual energy in their last four vertebrae, so use your mouth, hands or a toy to pleasure her as she visualizes breathing her sexual energy up her spine. If you're keen for some action yourself, have her get on top of you, while you are lying on your back, with her intimate parts above your head. Use both your fingers and your mouth to pleasure her, while she gives you oral. If she feels like she's going to come, stop, relax and start again.

4) Let go. You know what's really hot? A

woman who completely lets go. If you want her to be completely free and able to enjoy what you're doing to her, compliment her all the time. It's a known fact that women worry about how they look naked, the shape of their boobs when they're on their back, or whether or not their own orgasm face is fetching. This is something of a hindrance when she's (quite literally) pounding the road to mind-altering sex. To help her really, really relax, bring her right in the present. Not the past, not the future, but now. By complimenting the way she looks and sounds, she gets her mind off her complexes and can concentrate on her feelings, physical and emotional. Looking at her, smelling her, hearing her, touching and tasting her, you're helping her concentrate on her senses, and this is her best ally to reaching an orgasm. The more relaxed she is, the more fun you'll have too.

Good fingering is not only about the technique, but also about the element of surprise. If you do it in places you've never tried before, she'll get even more turned on. Here's a list especially made to enrich your sex life in ways you've never even imagined. If so far you've been afraid to do it in places like the beach or in your car, I've got a few tricks that can make you feel more comfortable and more secure. After all, the need to get frisky can happen anytime, anywhere. Thankfully, I've got a hot trick up my sleeve for every situation.

GOOD FINGERING IS NOT ONLY ABOUT THE TECHNIQUE, BUT ALSO ABOUT THE ELEMENT OF SURPRISE. IF YOU DO IT IN PLACES YOU'VE NEVER TRIED BEFORE, SHE'LL GET EVEN MORE TURNED ON.

1. ON THE BEACH

- In the summer, women might find themselves overcome with the urge to have sex on the beach- no, I'm not talking about the cocktail! Alfresco sex is always risky, so fingering is a more subtle way to unleash her desires. Find a secluded area and have her sit on a towel to prevent sandy bits. Wrap a towel or sarong around her waist, so that eventual intruders can't see that her bikini bottoms have been taken off. Insert your hand beneath the towel and start doing what you have to do. As long as she keeps the moaning to a minimum, it'll look like you're merely cuddling and enjoying each other's company... which, technically, you are!
- Another way is to build your own little beach fort for privacy. Lay down a blanket and put another one on top of it, with the corners secured by rocks or shoes. Get in between the layers, she laying on her back and you on your side, resting your head on your hand. Thus the superior blanket is raised and nobody can see what you're doing with your hands underneath.

2. IN THE CAR

- Car sex isn't just for horny teenagers looking for some private time. When you're in the mood, you're in the mood! Pull over somewhere safe and private, so that you don't get interrupted by a noisy pedestrian. Put your car seats as far forward as they'll go and move to the back seat. Have her straddle you and while you're cuddling, play with your hand beneath her skirt.
- Remember, the back seat of the car isn't the only place for naughtiness. Pull over to a quiet car park or road and lean over for a mix of oral and fingering. Think of it as your reward for doing all the driving while she dozed off. Don't attempt this if she's driving, while she's doing it. Not only is it illegal (the seatbelt factor), it's also pretty dangerous, as your pleasuring could, you know, be a little distracting.

3. ON THE FLOOR

- Even if there is a perfectly good bed at your disposal, doing it on the floor adds a wild and primal edge to your endeavors. It's true passion that you can't get on the bed. Try the Sitting Doggy: have her get on her knees, with her torso up and back straight and her hands on the couch or bed. Get into the same position, behind her, and start fingering!
- If you'd rather some eye contact, try getting tantric. The Yab-Yum is a classic tantric position, in which you sit on the floor with your legs loosely crossed or out in front of you, while she sits on your lap with your legs wrapped around your waist. It's best for slow, sensual fingering rather than hard and fast.

4. AT HER DESK

- When she's working from home or staying back in the office all alone, why not ease her stress with some desk or chair action? Be careful of office chairs, as

Magic Hands

Proven Secrets Of Driving Her Wild With Your Fingers

they have wheels and can slip if she gets too excited. The desk is much easier since she can just bend over with her skirt hiked up and her underwear pulled down. Or, if it's a sturdy table, she can sit on it with her legs spread while you kneel and do the job.

- If you do want to experiment on the chair, prop it on a wall and maintain it stable with your hands. Or you can sit on it, while she is straddling you backwards (facing away from you). Keep your hands in your lap and have her sit on them, so that you can use your fingers easily. Also, once you've inserted one or two fingers, she can start moving up and down, dictating everything from the angle of penetration to the depth at which your fingers thrust.

5. IN THE SHOWER

- Action in the shower is notoriously tricky- not only because of the very cramped space, but also because of the water factor, which can create major hazard. This is best done if she lays down, with her backed propped to the tub, while you crouch between her legs.
- If you're too concerned about taking a dive, you'll be distracted from the task at hand. So, for peace of

mind, ensure your bathroom is well equipped. Non-slip bath mats are essential. When you don't have to worry about face-planting the soap dish, you're free to enjoy your kinky shower exercise. If you're using lube, make sure you don't drip it on the floor, it's seriously slippery stuff.

MEET AND SATISFY HER OTHER G-SPOT

Not sure what I'm talking about? Here's a clue: it's not located down there and it can sure use some finger action for an extra set of hot sensations. Want to take bedroom bliss to a whole new level? All you have to do is pay special attention to her... nipples! Sure, we've talked about how good it feels for a woman when you play with them during foreplay and sex, but we've never realized their full potential. Until now.

According to a groundbreaking new study, her nipples, aka N-spots, are capable of providing- wait for it- mind-blowing sexual vibes. Who knew! Well, apparently scientists had a hunch. They recently discovered that sensations from a woman's nipples travel to the exact same part of the brain as sensations from your vagina, clitoris and cervix do... and other research has found that a small subset of women have experienced an orgasm from N-spot stimulation alone. Lucky girls!

SENSATIONS FROM A WOMAN'S NIPPLES TRAVEL TO THE EXACT SAME PART OF THE BRAIN AS SENSATIONS FROM YOUR VAGINA, CLITORIS AND CERVIX DO...

In short, second base can help you elevate your partner to serious levels of sexual bliss. Get in on that action by incorporating these playful moves into foreplay and sex. What are you waiting for? Grab your girl and get tweaking!

1. BEGINNER: A WARM-UP

- While she's wearing her thinnest cami, alternate between blowing hot breaths (with an open mouth) and cold breaths (with pursed lips) over her nipples.
- As you're passionately kissing, push her breasts out of her bra ever so slightly. The feel of the fabric rubbing against the edges of her nipples- yes, please.
- Buy a cheap electric toothbrush and run it around her nipples. The sensations are toe-curlingly good.

Magic Hands

Proven Secrets Of Driving Her Wild With Your Fingers

- Splash water on her fitted tee and gently bite her nipples- the wet fabric creates a barrier, so it hurts so good.
- Less risk of irritation upstairs means you can experiment with more edibles. Drip a margarita over her nipples and sip it up.
- Chopsticks. Find another use for them in the bedroom. Naughty pinching and squeezing, perhaps?

2. INTERMEDIATE: CRANK THE INTENSITY

- While she's on top, have her lean forward so that her nipples dangle above your face. You'll enjoy the view and won't be able to resist them.
- As you spoon, bring your hands around her nipples. Play with them by raising them up and turning them clockwise.
- Spice up missionary by rubbing her lacy undies over her nipples. The friction is addictive.
- Have doggy-style sex with her laying low on a tactile surface (like the bathroom tiles or a shag rug). With every thrust, her nipples get a special little treat.
- In the shower, have standing sex from behind and let her soaped-up nipples slide against the wall with each thrust.

3. *ADVANCED: TOUCH LIKE THIS FOR AN ORGASM*

- Step one: Tease her breasts with your tongue and fingers. Explore all areas except her nipples.
- Step two: Graze the tips of your fingers lightly against her nipples. This move will have her begging for more.
- Step three: If she likes it rough, massage them harder, using the pads of your thumbs.
- Step four: Cup your hand over one breast at a time so that the tip of her nipple rests between your thumb and index finger. Squeeze lightly and lick it with the tip of your tongue.
- Step five: With your lips puckered around her nipple, start sucking gently but firmly, bobbing your head up and down until you bring her home for the win.

As I'm sure you've understood by now, you don't have to be a gymnast to be great in the bedroom. And sometimes the most underrated sex moves, like fingering, can, contrary to popular belief, rock her world more than ridiculous porn-star positions or techniques. There are some instances when simplicity works better. And, trust me, with these moves, you're guaranteed to win bedroom brownie points. Every. Single. Time.
